**TO PLAY**

Pick a challenge and review the clues provided.

Using the clues, fill the chocolate tray with all nine chocolate pieces in their correct positions.

When you think you've completed an order, flip the page over to see if you have correctly filled the customer's order.

**UNDERSTANDING THE CLUES**

For each challenge, there is only one way to place all the pieces, and the clues provide you with enough information to find the solution.

Each clue is a partial snapshot of the completed chocolate arrangement.

Some clues can fit several places on the chocolate tray. With these, you must use your solving abilities to determine which is the correct position.

Some clues can only fit one way within the chocolate tray. With these, you have exact information to place the pieces correctly.

**COLOR AND SHAPE OUTLINES**

Clues may contain color or shape outlines as well as whole chocolate pieces. When you can specifically identify both a color and a shape as belonging on a space on the game grid, you will have enough information to place the piece.

**SHAPE & COLOR PLACE-HOLDERS**

The Shape and Color Place Holders will help you solve the challenges. They are particularly helpful on the Advanced and Expert levels! Here’s how they work: If you determine that a space on the game grid will be a particular shape but still don’t know the color, simply use a place holder to help remember this partial information. Then if a later clue reveals the correct color, you can now place the corresponding piece on the board.

Many challenges will require you to deduce your own information in addition to what is given by the clues. In the above example, you have enough information to complete the challenge, but additional information to place the piece correctly.

**CHECK YOUR ORDER!**

When all nine chocolate pieces are in the tray, flip the page over to see if you have correctly filled the customer’s order.

If your assortment matches the solution on the back of the page, YOU WIN!

**ABOUT CHOCOLATE FIX**

Chocolate Fix is a logical deduction puzzle in its simplest form: a 3x3 Tic-Tac-Toe style grid with nine pieces each with 2 attributes. Inspired by Logix™ and Think-a-Dot™, Chocolate Fix was created by the ThinkFun team as a really fun way to demonstrate the thinking process at work.

Chocolate Fix game rules and challenges were developed by Mark Engberg. Also, check out the iPhone App, which was programmed by Sam Ritchie.

And now for the Challenges and Solutions...

**INSIDE FRONT COVER**

COLOR AND SHAPE OUTLINES

Clues may contain color or shape outlines as well as whole chocolate pieces. When you can specifically identify both a color and a shape as belonging on a specific square, you can place a whole piece there.

Many challenges will require you to deduce your own information in addition to what is given by the clues. In the above example, you have enough information to complete the challenge... which piece belongs in the center square?
SHAPE & COLOR PLACE HOLDERS

The Shape and Color Place Holders will help you solve the challenges. They are particularly helpful on the Advanced and Expert levels! Here's how they work: If you determine that a space on the game grid will be a particular shape but still don't know the color, simply use a place holder to help remember the partial information. Then if a later clue reveals the correct color for the same space, you will know both the color and shape!
