OVERVIEW:
Welcome to the Mystic Market, where witches, sorcerers, and adventurers gather to trade enchanted ingredients and craft magical potions! Will you invest in Dragon Scales or Phoenix Feathers? Perhaps you will corner the market on Orc Teeth or Pixie Powder. Buy Mermaid Tears when the price is low! Sell Kraken Tentacles when demand is high! Or, make mischief by concocting potions of your own. Beware—the values of these precious ingredients are constantly shifting, and only the shrewdest investor will prevail. Business is booming at the Mystic Market! Do you have what it takes to make the largest fortune in the enchanted world?

OBJECTIVE:
BUY Ingredients from the Market and then SELL complete sets for Coins. Pay attention! The cost to buy Ingredients and the value of complete sets will change over the course of the game. If the cost is too high to buy, SWAP Ingredients in your hand with those in the Market, or Craft them into powerful Potions!

At the end of the game, the player with the most Coins from selling Sets of Ingredients and crafting Potions—WINS!
INCLUDES:
6 Ingredient Vials

Red Dragon Scales  Orange Phoenix Feathers  Yellow Orc Teeth
Green Kraken Tentacles  Blue Mermaid Tears  Purple Pixie Powder

1 Value Track
66 Ingredient Cards

16 Dragon Scales
16 Phoenix Feathers
10 Orc Teeth
10 Kraken Tentacles
7 Mermaid Tears
7 Pixie Powder

20 Potion Cards

3 Elixir of Luck
3 Fortune Serum
3 Tonic of Borrowing
3 Tonic of Mystery
2 Exchange Elixir
1 Serum of Forfeit
1 Duplication Tonic
1 Elixir of Wealth
1 Plunder Tonic
1 Reduction Serum

6 Supply Shift Cards

4 Reference Cards

ON EACH TURN, DO ONLY ONE OF THE FOLLOWING:

BUY 1 or 2 INGREDIENT CARDS fromIngredient Market OR Deck
SWAP 1 or 2 INGREDIENT CARDS fromIngredient Market ONLY
MOVE 1 or 2 INGREDIENT CARDS to another Ingredient Deck

You may also CRAFT potions!

Coins

45 One-value Coins
20 Five-value Coins
10 Ten-value Coins
SETUP:

1. Select a dealer to shuffle the Ingredient and Potion Decks, then:
   • Deal each player 4 Ingredient Cards, face-down.
   • Give each player 5 One-value Coins, and one Reference Card.

2. Form the Ingredient Market by dealing 5 Ingredient Cards in a row, face-up.
   Tip for New Players: Try a practice game, leaving out steps 3 and 4 (Supply Shift and Potions) to get the hang of basic game play. Then proceed to a full game including Supply Shift and Potion Cards.

3. Place the 6 Supply Shift Cards face-down and mix them up. Then, distribute 3 of the 6 Supply Shift Cards randomly throughout the remaining Ingredient Deck, and re-shuffle the entire deck. Return the remaining 3 Supply Shift Cards to the box—you will not need them. Place the Ingredient Deck face-down beside the Ingredient Market.

4. Form the Potion Market by dealing 5 Potion Cards in a row, face-up, opposite the Ingredient Market. Place the remaining Potion Deck face-down beside the Potion Market.

5. Leave room near the Ingredient and Potion Markets for two discard piles and a Bank of Coins.

6. Assemble the Value Track by placing the 6 Vials of Ingredients on the Track with the Vial of Purple Pixie Powder at the 15 mark, Blue Mermaid Tears at 12, Green Kraken Tentacles at 10, Yellow Orc Teeth at 8, Orange Phoenix Feathers at 6, and the Red Dragon Scales at 5, as shown.
THE VALUE TRACK:

HOW IT WORKS

- The positions of the Ingredient Vials on the Value Track represent the current value of each type of Ingredient Card in the deck.

- The **cost** to buy individual Ingredient Cards and the **value** of complete sets change based on the position of the Vials on the Track.

- Over the course of the game, Ingredient Vials will be moved to the top of the Track, causing other Vials to roll into new positions, changing costs and values.

HOW TO PLAY:

- Players take turns in a clockwise direction from the dealer.

- Each turn, the active player must choose only one of the following actions: **BUY**, **SWAP**, or **SELL** Ingredient Cards. **They may NOT combine these actions.**

- Players may **also** Craft Potions during their turn in addition to Buying, Swapping, or Selling. (You can learn more about Potions on page 10.)

- A player may not pass on their turn.

- A player’s hand can never have more than 8 Ingredient Cards at the end of their turn. Cards must be discarded to limit the hand to 8 Ingredient Cards. Potion Cards do not count toward this hand limit.
**BUY:**

BUY 1 or 2 Ingredient Cards per turn from the Ingredient Market or off the top of the Ingredient Deck. (A player may buy one card from each.) Replenish the Ingredient Market immediately after buying an Ingredient Card by drawing the top card from the Ingredient Deck and replacing the purchased card.

- **When buying cards from the Market, pay the current cost based on the position of the matching Ingredient Vial on the Value Track.**

- **When buying cards from the Ingredient Deck, pay a standard cost of 2 Coins per card.**

**SWAP:**

SWAP 1 or 2 Ingredient Cards from your hand and replace them with the same number of Cards from the Ingredient Market. Cards may NOT be swapped with cards from the Ingredient Deck.

- **No Coins are exchanged during a SWAP.**
SELL:
SELL Ingredient Cards as complete sets to earn Coins or sell single cards to shift Ingredient values.

Note: The number of cards required to make a set is shown on the cards.

- Complete sets – collect the number of Coins equal to the current value of the Ingredient on the Value Track AND perform a Value Shift.
- Value Shift – Move the Ingredient Vial for the Ingredient being sold from its current position on the Track to the top of the Track at the 5 mark. Other Ingredient Vials will roll down the Track, shifting their values, as well.
- Single cards – collect NO Coins BUT STILL perform a Value Shift for the Ingredient being sold.
- Players may SELL as many times as they choose per turn.

SUPPLY SHIFT:
When a Supply Shift Card is drawn, move an Ingredient Vial determined by the Supply Shift Card to the 15 mark on the Track by cycling any Vials below that colored Ingredient Vial. Vials are cycled, one at a time, beginning with the lowest on the Track, up to the 5 mark, until the color of the Vial on the Supply Shift Card is in the 15 mark position.
When a Supply Shift Card is drawn from the Ingredient Deck, whether to replenish a card bought from the Ingredient Market or when a player has bought a card from the Ingredient Deck for their hand, the effect of the Supply Shift Card is resolved immediately. The player should still draw from the Ingredient Deck after completing the Supply Shift on the Value Track. In the event that two Supply Shift Cards are drawn in a row from the Ingredient Deck, resolve the effect of the cards in the order that they were drawn. Supply Shift cards do NOT count toward cards purchased.

POTIONS:

Potions can be crafted at any time during a player’s turn. To Craft a potion, choose one of the Potion cards from the Potion Market and discard from your hand the two Ingredient Cards shown under Cost on the top of the Potion Card. The Potion Card is now yours to play whenever you wish. Replenish the Potion Market immediately after crafting a Potion by drawing the top card from the Potion Deck and replacing the crafted Potion.

• Players can Craft as many Potions as they like during their turn.
• Players collect the number of Coins shown under Profit when Potions are played, not when they are Crafted.
• Potion Cards can be played at any point in the game, even during another player’s turn. Once played, the effect of the Potion is resolved immediately, the Profit marked on the card is collected, and the Potion Card is discarded.
• If the Potion Deck is ever depleted during play, it is NOT replenished.
END OF GAME:
When the last Card from the Ingredient Deck is drawn, the current player completes their turn. All players then take one final turn to SELL Cards, CRAFT Potions, or play Potions. The player with the highest value in Coins at the end of the game—**WINS**!

For a shortened game, the first player to collect 30 Coins—**WINS**!

**Note:** For a shortened game, you do not need to play though the entire Ingredient Deck.

ABOUT THE INVENTOR:
Ken Gruhl is a game designer living in Chicago, with a love of making games that are fun for all ages. His fond memories of playing games growing up gave him the desire to provide that same experience for others. During a brainstorm, he had the idea of using gravity to help track the pricing of a market, and this game popped into his head. Aside from making games, he enjoys cheering on the Michigan State Spartan teams and making pizza with his wife.
